Vinh Thuan - Hai Phong

Professional Summary

A results-driven **Senior Automation Test Engineer** with nearly 8 years of proven experience in major automotive and electronics manufacturing corporations, including **Pegatron, LG Display, and VinFast**. Expert in PLC programming (Mitsubishi, Omron), industrial robotics (ABB, YASKAWA), and communication protocols (CC-Link, RS232, TCP/IP). Demonstrated track record of optimizing equipment capacity, increasing automation rates, and improving production efficiency (LOB, UPH). A strong technical leader skilled in project management and cross-functional collaboration to deliver high-quality automated testing systems.

Education

Automation Engineering

04/2022 - 04/2025

Thai Nguyen University of Economics and Technology

- Top-up Bachelor's Degree
- **GPA: 3.25/4.0 (Excellent Classification)**

Work experience

Maintenance Technician

12/2018 - 02/2020

VinFast Manufacturing and Trading Joint Stock Company

- **Performed troubleshooting, maintenance, and repair** of production equipment at the GA (General Assembly) workshop, Chassis 3 line.
- **Maintained and optimized** machinery in the engine compartment assembly area for Lux A and Lux SA car models to ensure continuous production.
- **Monitored equipment status** daily to prevent breakdowns and minimize assembly line downtime.

Technical Support Engineer

02/2020 - 09/2024

LG Display Vietnam Hai Phong Company

- **Managed and optimized** PLC Auto programs on production lines, including Robots, PLCs, Conveyors, and Testing machines.
- **Planned and reported** on machine installation, setup, and troubleshooting processes.
- **Improved** machine capacity and product quality to meet KPIs, reducing energy waste and increasing efficiency.
- **Acted as a Technical Trainer** to support the training department in PLC and Machine subjects.

Innovation Engineer

09/2024 - 05/2025

Bumjin Electronics Vina Co., Ltd

- **Enhanced** equipment capacity and tool production to increase the automation rate across production lines.
- **Developed** ideas and **implemented** projects related to equipment installation for new electronic models.
- **Optimized** production technology and the overall process, including Line of Balance (LOB) and Units Per Hour (UPH).
- **Took main responsibility** for electrical cabinets, PLCs, and Robots, while **monitoring** contractors' progress during new machine setups.

Senior Automation Test Engineer

05/2025 - Present

Pegatron Vietnam Co., Ltd

- **Led the design, development, and Deployment** of automated system test equipment for production lines.
- **Programmed and optimized** advanced automation software and test scripts to improve test coverage and accuracy.
- **Evaluated and validated** automated test systems to ensure compliance with technical specifications and quality standards.
- **Collaborated with cross-functional teams** to troubleshoot complex technical issues and drive continuous improvement in test efficiency.

Career goals

- To leverage my extensive experience in automation and system testing to deliver high-quality, innovative technical solutions.
- Short-term goal: Successfully manage and optimize advanced automation systems while leading technical teams to meet strict production KPIs.
- Long-term goal: Advance into an Engineering Manager or Automation Technical Lead role, contributing to the strategic growth of the company.

Skills

Proficient in PLC programming (Mitsubishi Q Series, Omron) and advanced robot control, including repair and replacement of ABB and YASKAWA Robots.

- **Strong expertise in improving production processes and increasing automation rates.**
- Skilled in Servo motors, stepper motors, and inverter installation.
- Deep knowledge of automatic electrical equipment (Sensors, solenoid valves, relays, terminals).
- Well-versed in industrial communication protocols: RS232, RS485, TCP/IP, Ethernet/IP, CC-Link.
- Proficient in office computer skills, including Excel VBA and Macro programming.
- Strong leadership, planning, teamwork, and independent problem-solving skills under high-pressure environments.

Languages

- **English:** Proficient in reading technical documents, writing reports, and effective workplace communication.
- **Chinese:** Basic listening and speaking, capable of simple work exchange with colleagues.
